Subject: Task Order - Technical Support to the District for
Review and Investigation of GSP Implementation Activities During 2022
Cuyama Basin Water District
(EKI B70069.02)

Dear Mr. Klinchuch,

The Cuyama Basin Water District (District) has requested that EKI Environment and Water, Inc. (EKI) provide a scope and cost estimate to perform additional technical support tasks in calendar year 2022, related to Groundwater Sustainability Plan (GSP) implementation within the District's portion of the Cuyama Valley Basin (Basin). Note that some of the tasks herein (e.g., attendance at meetings) have been completed already.

SCOPE OF WORK

The scope of work outlined below is focused on providing technical support to the District related to various work being conducted by the Cuyama Basin Groundwater Sustainability Agency (GSA) for GSP implementation. For simplicity, all activities are lumped under two tasks. Task 1 is technical assistance with several subtasks, and Task 2 is District Board meetings and GSA Board meetings. Likely subtasks are summarized below with pertinent details; some subtasks may change as issues arise, but all work performed will be at the District's direction and authorization.

Several of the subtasks proposed below involve review of draft documents, model files, or plans from GSA staff and consultants (usually Woodard & Curran; WC) before they are approved by the GSA, in order to provide an outside perspective on the proposed actions and effect a better final outcome for the District. Thus, timing of these tasks can be critical, and EKI may need help from the District to obtain draft and preliminary materials in a timely manner. EKI will conduct our reviews of these materials rapidly and provide results as soon as possible, in order to allow the District time to take action at the District and GSA Board meetings.

Task 1. Technical Assistance to the District During 2022

EKI will assist the District by reviewing the revised GSP draft and other technical documents and information, both from the GSA staff and also from outside sources, as pertinent to one or more subtasks identified below. Part of EKI's review may include model simulations using the Cuyama Basin Water Resources Model (CBWRM) to check assumptions and recalibration efforts, as well as preparation of electronic documents, maps, tables, diagrams, and visual explanations to be presented at District Board meetings or distributed to the District via email or other means.

Review of GSP Revisions and Modifications

The GSA identified four general responses to DWR-identified deficiencies within the GSP. GSA Staff have responded with an outline of proposed GSP changes to address the deficiencies. EKI will seek to obtain the revised GSP draft, and will review proposed changes prior to finalization and submittal.

Aquifer Pumping Test Review

EKI will review efforts and information related to the preparation, execution, analysis, and interpretation of the hydraulic (aquifer pumping) test program in the Basin. EKI will communicate with the District and GSA staff regarding specifics of the program, including recommended modifications or adaptations of execution or analysis of obtained data.

Model Update And Recalibration Review

The Cuyama Basin Water Resources Model (CBWRM; or model) is being updated with historical water-level, evapotranspiration, and other data through Water Year 2021 (i.e., through September 2021) and various input parameters may be adjusted (recalibrated) after the update to further improve the model by reducing its residual error. EKI will review aspects of the model update and recalibration process, including data inputs, areas of focus, implementation of hydraulic testing data and other recent data, and will make recommendations as appropriate. As needed, EKI will engage the technical consulting services of Charles Brush, Ph.D., P.E., a water resources engineer with specialized experience in the IWFM model code used in the CBWRM.

Model Use to Answer District Questions on Groundwater Management Options

Under direction from the District, EKI will change input parameters and run the model, as needed, to (a) address questions or concerns that arise, (b) examine likely changes to pumping allocations or management area conditions driven by the addition of new data and recalibration, or (c) to simulate changes in pumping or land use scenarios the District may want to examine. As needed, EKI will engage the technical consulting services of Charles Brush, Ph.D., P.E., a water resources engineer with specialized experience in the IWFM model code used in the CBWRM. Four Technical Forum Meetings With WC And Other Technical Parties

EKI will participate in four planned Technical Forum meetings with GSA Staff and other technical consultants with interests in the Basin¹. EKI will provide feedback to GSA staff and updates to the District after these presentations.

¹ The first Tech Forum meeting took place on 1 Mar 2022. EKI, GSA Staff, and other interested stakeholders attended.

Review Draft GSA Annual & GW Conditions Reports

EKI will review the draft WY 2021 Annual Report² and draft WY 2022 Groundwater Conditions Report produced by GSA Staff, and will provide comments to GSA staff and the District, as needed.

General Technical Assistance, As Needed

Other technical tasks may arise from time to time for which the District has interest. EKI will provide technical support to the District, as requested by the District Board of Directors. For budgeting purposes, EKI assumed an annual total of \$15,000 for this subtask, at the District's option.

Task 2. Attend District Board Meetings and Cuyama GSA Board Meetings³

EKI will attend District Board of Directors meetings, and generally will present a technical update and progress report for items reviewed and activities performed. Preparation time is included for each meeting.

EKI will remotely attend GSA Board meetings to keep abreast of the status of GSP implementation and other issues confronting the Basin.

Under Task 2, EKI will:

- Prepare for and attend up to twelve (12) Monthly District Board meetings in calendar year 2022, assumed for budgeting purposes to be six remotely attended and six in-person; and
- Attend up to six (6) planned GSA Board meetings for 2022, all remotely via video or audio call.

Note that EKI in-person attendance at District Board meetings is approximately double the labor cost of remote meetings, so the ratio of remote to in-person attendance can be modified to reduce costs, as needed.

For budgeting purposes, project management is estimated at approximately 4% of labor cost, and EKI's standard 4% communications fee is applied.

SCHEDULE

EKI is prepared to start work on the above Scope of Work immediately upon authorization from the District to proceed. It is anticipated that technical materials will be presented to the District at various Board Meetings as appropriate, depending on the schedule of completion of the various plans and documents to be reviewed.

² EKI reviewed the WY 2021 Annual Report in February 2021, and presented results to the District at the 23 February 2022 Board meeting.

³ In 2022, EKI has attended and made presentations at District Board meetings on 26 January and 23 February; and has remotely attended GSA Board meetings on 5 January and 2 March.

TERMS AND CONDITIONS

We propose work performed by EKI under this Task Order be conducted as an addendum, pursuant to the Terms and Conditions of our existing Agreement with the District.

COMPENSATION

Inasmuch as the exact level of effort required to complete the above Scope of Work cannot be known precisely, EKI proposes to perform the work on a time and materials expense reimbursement basis in accordance with our current Schedule of Charges. The estimated budget for this scope of work is shown by task, below, assuming all subtasks are authorized. We will not exceed the total amount without additional authorization.

To: Cuyama Basin Water District Board of Directors
From: Matt Klinchuch, Manager
Date: March 23, 2022
Subject: Agenda Item #8d: District 2022 Budget and Assessment

Dear Directors:

For discussion regarding the District's 2022 Budget and corresponding Assessment to landowners, this memo and attachments intends to inform of different directions and options the District may take in response to anticipated activities for the 2022 year.

An Ad Hoc of the Board (Directors Wooster and Vickery) met to discuss the approach for the 2022 Budget and Assessment year. The current situation for the District is very similar to the position a year ago for 2021. For this reason, the Ad Hoc recommends a similar approach to the 2021 year in keeping the assessments reduced and working from District reserve funds for expenses surpassing the proposed assessment revenue.

- Covering Reduced Administrative Only (See included Table 1). This option considers the previous experience with the administrative tasks and where expenses may be reduced, such as lower travel expenses. This option would cover the administrative tasks as contemplated (\$176,000), with the remaining GSP Implementation costs working from District reserves. This option puts the 2022 Assessment at \$5.00 per irrigated acre and \$0.44 per non-irrigated acre to generate approximately \$176,000.

Additional information is included on the following pages for the other budget considerations and potential options evaluated to date.

The following are items for awareness when considering different 2022 Budget and Assessment options:

- The Cuyama Basin GSA is operating by a volumetric charge on groundwater pumping. This rate is anticipated to increase as pumping quantity is reduced.
- Reductions to groundwater pumping begin for the Central Management Area in 2023, therefore 2022 will include planning around these reductions.
- Maximum rates through the Proposition 218 have locked going forward (absent future Prop. 218 efforts). The maximum budget through the Prop. 218 is just over \$525,000 with approximately \$225,000 associated with District administration (management, legal, insurance, etc.) and the remaining \$300,000 associated with GSP Implementation. This maximum corresponds to rates of \$16.13 per irrigated acre and \$0.45 per non-irrigated acre. See included Prop. 218 table (Table 2).

Four potential budget/assessment options for assisting the Board's discussion:

- Maximum Assessment (See included Table 3). This would assess the maximum to cover District Administration costs and GSP Implementation. Some GSP Implementation is foreseen (EKL Technical Support), this rate would cover these costs and any additional efforts up to \$300,000. The 2022 Assessment would correspond with the Prop. 218 with \$16.13 per irrigated acre and \$0.45 per non-irrigated acre to generate approximately \$525,000.
- Cover Foreseen Costs (See included Table 4). This would assess to cover the current known costs the District. This assumes \$151,000* for technical support. This option puts the 2022 Assessment at \$11.40 per irrigated acre and \$0.45 per non-irrigated acre to generate approximately \$375,000.
- Cover District Administration Only (See included Table 5). This would cover the administrative items to the maximum contemplated (\$225,000), with the remaining costs working from District reserves. This option puts the 2022 Assessment at \$6.55 per irrigated acre and \$0.45 per non-irrigated acre to generate approximately \$225,000.

*\$151,000 used for estimates as it is similar to the 2021 budget amount. This value is to be firmed through discussion with EKL.

RE: Cuyama Basin Water District 2022 Assessment

Dear Landowner:

Enclosed you will find the 2022 Assessment Statement from the Cuyama Basin Water District (hereafter referred to as "the District"). The District is composed of approximately 83,000 acres, including most of the irrigated lands in the Cuyama Valley Groundwater Basin with the primary purpose of providing local representation on behalf of the District's landowners regarding implementation of the 2014 Sustainable Groundwater Management Act, or SGMA. This law required that a Groundwater Sustainability Plan (GSP) be developed before January 31, 2020 and that it provide for the groundwater basin being "sustainable" (generally meaning in a balanced condition over the long term) within 20 years. The District through partnership in a Groundwater Sustainable Agency (GSA) with the four counties (Santa Barbara, San Luis Obispo, Ventura, and Kern) covering the Cuyama Valley Basin and the Cuyama Community Services District submitted a GSP ahead of the January deadline. Implementation of the GSP is now commencing through activities such as monitoring and reporting.

The District will operate based upon assessments on parcels based upon 'Irrigated' or 'Non-Irrigated' classifications as established through an Engineer's Report develop through the 2017 Proposition 218 process. The Proposition 218 effort contemplated the 5-year period spanning from 2017 through 2021, at which point the maximum assessment rates locked absent another vote. Therefore, the corresponding maximum assessment could be \$16.13 per acre for Irrigated Lands, and \$0.45 per acre for Non-Irrigated Lands.

At this time the District anticipates that the expenditures for the upcoming fiscal year will be lower than what was budgeted in the Engineer's Report. Consequently, the Board of Directors is considering exercising its discretion to assess less than the maximum assessment rate for 2022. The 2022 Assessment Rates are \$X.XX per acre for irrigated acres and \$X.XX per acre for non-irrigated acres. As the enclosed Statement indicates, the assessment is due and payable as of April #, 2022, and payment is requested within sixty (60) days. If you have any questions regarding the specific information on the attached statement, please contact Matt Klinchuch at mklinchuch@ppeng.com, or (661) 616-5900.

You are encouraged to continue to participate in the SGMA process with the District. The District aims to act as the voice of its landowners and will need your input as the process moves forward.

Respectfully,

Matt Klinchuch, PE
General Manager-Assessor-Collector
